In addition to the above information, the following is a required part of the submittals for permit:

The tank(s) is/are to be removed from the site in accordance with applicable laws and regulations. Documentation of the disposition of the tank(s) is/are to be provided with application.

Removal of AST or UST is to comply with the IFC 2015 and 40CFR

At least one (1) 2A:20BC fire extinguisher shall be on site and readily available at all times.

Documentation of the planned disposition of the contents of the tank(s) is required in writing at time of application. The tank shall be gas free or inerted PRIOR to removal.

No later than 10 days AFTER the tank removal, you must submit documentation of the disposition of all waste liquid and sludge to the Fire Prevention Bureau.

All piping at all tank openings shall be disconnected, the tank(s) purged, and all tank openings plugged or capped PRIOR to removal.

All piping and equipment is to be removed in accordance with IFC 2015 requirements.

Issuance of a tank removal permit does not replace any license or permit required by any other agency or Dept.
